

# 改用 Ramda

```
import * as R from 'ramda';
```

```
const sumArrayString = R.compose(R.sum, R.map(Number));
```

```
function onClick (value) {  
  console.log(value) // ['290', '123', '234'];  
  const result = sumArrayString(value);  
  console.log(result);  
}
```

有沒有覺得自己像魔法師了？
